TAKING CARE OF YOUR MIRROR

INSTALLATION

We supply each mirror as a freestanding mirror. Before mounting the mirror to the wall, please make sure you're using the correct fixings for your wall type, as you may require a secondary fixings.

MAINTENANCE

We recommend minimal cleaning with a soft lint free cloth or duster. Please avoid rubbing the surface as this may damage the finish. Please also avoid cleaning the household cleaners, wax-polish or any other abrasive cleaners as this will interfere the gentle evolution of oak and glass.

ENVIRONMENT

Your mirror frame is made from solid oak and has a surface that never stops responding to its environment. This is a wonderful thing! However, it does mean that fast, extreme, or imbalanced changes in temperature or humidity may affect both the aesthetic quality and longevity of the piece so should be avoided.
