

MATTHEW COX

TAKING CARE OF YOUR OCULUS CONVEX MIRROR

Your Oculus convex mirror frame has a waxed surface and as such needs protecting from light day-to-day use. If you would like to avoid any obvious damage to the frame, please remove any marks as soon as they happen.

CLEANING

The surface should only be cleaned lightly with a soft cloth or duster. A barely damp soft cloth can be used for anything trickier to remove, but please resist any urge to rub hard. No abrasive cloth or cleaning agent should ever be used to clean the frame. A soft cloth and any household glass cleaner can be used to wipe the mirror plate clean.
